Learner Enrolment

At Australian Agricultural Training our approach to enrolment and induction is to provide a pathway for learners to make informed decisions about their training and assessment and enter a training pathway that is the right fit for the learner and their current or future employer.

We strive to identify a learner's needs during the enrolment process to ensure that our services to each individual learner are appropriately adjusted to allow for their unique requirements.

To achieve this, we will:

- Provide persons making an enquiry with accurate and ethical marketing and pre-enrolment information that enables them to make confident and suitable decisions about selected training programs;
- Conduct a one-on-one enrolment interview either face-to-face or over the telephone to individually assess the person's needs and circumstances and provide them information about their rights and obligations;
- Provide information about special requirements for their desired training program and pathways to obtain these;
- Provide information about the occupational outcomes produced by their selected program and discuss how these align with their occupational goals and aspirations;
- Validate that applicants meet the entry requirements for their selected program to ensure that they have the greatest opportunity for success and completing the course;
- Determine if the applicant has the required access to information technology including modern computer systems and access to the internet if applicable.
- Determine that the applicants have appropriate language, literacy and numeracy skill and abilities to meet the requirements of their desired training program;

PRE COURSE REVIEW

- Determine if the applicant has any need for reasonable adjustment at the point of enrolment to allow training programs to be suitably adjusted;
- Ensure there are no unnecessary barriers for persons to participate in the training program of their choice;
- Provide comprehensive administrative support that allows the applicant to complete enrolment efficiently and commence training at an agreed time and place; and
- Inform applicants about alternate pathways to training such as gaining credit transfer for current competence or recognition of prior learning.
